

## ***Happy New Year – and an Exciting Year Ahead!***

*Edinburgh, Scotland, 12<sup>th</sup> January 2006*

Happy New Year – and All the Best for 2006!

With 2006 comes an extremely exciting period for HSL, with many significant projects and activities set to further boost the company's profile and enhance overall service provided to clients.

Continuing their focus on enhancing technical capabilities and infrastructure available, HSL plan to further increase the deployment of their own SS7 infrastructure during 2006, enabling them to connect directly into the signalling networks of UK and European mobile networks. This on-going strategy is ultimately aimed at providing a unique level of direct interconnection within the SMS industry, resulting in a more reliable, efficient and robust messaging service for all clients. Significant announcements are expected in this area within the first few months of the year.

In conjunction with the technical developments and enhancements, HSL are also experiencing rapid commercial growth and an ever increasing demand for their services. Additional staff members are being recruited in the Technical Support team, ensuring that HSL are well-equipped to handle all client requirements efficiently.

HSL's participation at the 3GSM World Congress in Barcelona, from 13<sup>th</sup> – 16<sup>th</sup> February, is the first significant project to take place. 3GSM presents an ideal opportunity for HSL to continue their on-going drive and to highlight the aspects of service that have earned them their position within the industry to date.

HSL can be visited at 3GSM on Stand G98 in Hall 2, and anyone interested in organising a meeting with HSL should use the contact details below:
